

2023-2024 SOAR Fellow
Eunjin Tracy, PhD (she/her/hers)
Postdoctoral Scholar, University of Pittsburgh
elt70@pitt.edu

Dr. Eunjin Tracy is currently a postdoctoral scholar who receives training in sleep and circadian rhythms at the University of Pittsburgh (primary mentor: Dr. Daniel Buysse. Secondary mentors: Drs. Brant Hasler & Martica Hall). Her research interest is the ways in which health-related stress, sleep and circadian rhythms, in the context of couple and family relationships, shape trajectories of healthy aging and disease. Dr. Tracy completed her PhD in human development and family studies at the University of Wisconsin-Madison and her first postdoctoral training in developmental/health psychology at the University of Utah. She will begin her position as Assistant Professor at the University of Missouri-Columbia in the fall of 2023.

Her long-term career goal is to apply a family systems perspective to public health research by focusing the role of sleep and circadian rhythms. She is planning to submit NIH NHLBI K01 grant proposal at the end of the SOAR program.
